

Alert! Thefts, Break-ins

Community:

Recent break-ins and thefts in our community. The Stuckys (347 Luzern Dr.) report that thieves stole a copper rain chain and copper bowl from their front porch recently. They also report that their neighbors found that a house near theirs had been broken into, and that at another nearby home the garage had been opened and the home's windows tampered with. These homes are directly across Luzern from the Stucky's home. The Stuckys have filed a report with the County Sheriff's Department.

By coincidence, a day later, I heard from Bill Mehleisen (316 Jung Frau Hill Rd) that there was an attempt to break into his home—while he was there. At 9:15 a.m. on Monday, a black Chevy sedan drove up his driveway. The driver got out and attempted to use the garage key code on the garage. Then he or she (winter clothing obscured gender) went around to the unlocked side door on the garage. They saw Bill's car there and surmised someone was home. By the time Bill got outside to try to ask what they wanted, they were driving away, stopping first at the bottom of his driveway to pick up a real estate flyer. Then they drove down Bern Way.

He reports that the car had Utah license plates, the numbers being Y12-713 or Y12. **Please be alert for a black Chevy sedan with license plates with numbers similar to these.**

Bill also reports that the County Sheriff's office has received several additional reports of similar activity.

Best Regards,

Lawrence Headley
